Childcare philosophy and goal

Our childcare philosophy

Creating the foundation to make a happy life.

Children are looking forward to the future to strive towards their dreams, hopes and all the good possibilities. Our childcare philosophy assists them on their journey to achieve their vision. So they can enjoy their lives. As they spend the most important time in their childhood with us, we help them to develop their personalities and to have good individual attributes of each child.

Childcare goals

A Child who thinks "I can do it!"

One of the most important values for children is "self-affirmation. "At Matsubara Himawari, we value the experience of developing into ourselves in our daily childcare. As they work towards what feels natural to them, our staff will be happy to support them in how "they can do it!", which connects to the confidence of each child. They eventually accumulate a large pile of "I can do it", from small accomplishments day after day. We allow for the raising of children that love themselves.

A bright and cheerful child

A childhood that is full of glitter and excitement only can happen once in life. We want them to spend their childhood, they way they want to, as much as they can. Focusing on the basic cycle of "playing well, eating well, sleeping well", A nursery that allows for the making of wooden toys naturally gives way to children with smiles and boundless excitement.

A child who cares for his friends

The time spent together with their friends multiplies the enjoyment of it all. Anything that could cause their sadness and loneliness is greatly diminished. We want to be a nursery school that allows these kinds of experiences. Even if they sometimes bump into each other or fight, we want them to feel the wonderfulness of being friends, and experience making up each time. The many opportunities to interact with friends of different ages should be a wonderful source of inspiration to each other.

The commitment of Matsubara Himawari

Warm childcare that feels like home

For small children, the most important thing is the time they spend with each other.

I want to create an environment that feels like home in a nursery school. With that in mind, we chose intimate childcare through small groups. Children learn a lot from the experience of being cherished and loved. The great time that they have in Matsubara Himawari lets their minds become enriched.

Handmade lunch

I want them to eat foods filled with love because you are a growing child. Believing that, we are particular about homemade warm lunch. Warm and loving foods naturally eliminates the likes and dislikes about food. It is a nursery school lunch that fills their stomach and heart with warm food that they eat with everyone.

Rhythmic classroom

"Sound" is one of the very first sensations the baby encounters. "Sound" and "rhythm" coordinate through the ears and are expressed through hands while they are playing. Expressive dance and performance allow for children to do this in their own ways, and is very important for developing their imagination. We are aiming for rhythmic activities that allows them to fully enjoy the growth that starts with your ears.

English classroom

English Class starts with the desire to enjoy a fun and open atmosphere.

Unique to English. I always enjoy it with the same English teacher, so children naturally get used to English. A future which involves a global society in the world becomes more and more familiar to them. We support children that can take off into the world with the feeling that "English is fun".

Room full of trees

The warmth of warm wood is important because they are still small infants. I want them to spend a relaxing time surrounded by the peace of mind that is unique to wood.

The scent, texture, and the fun of the patterns that improve a child's imagination. A room filled with trees, each with a different face, naturally delivers a bright smile to them.
